HOW AN EDITOR GOT WEALTH

A man tells of a country editor who started out poor 20 years ago and has retired with the comfortable fortune of \$50,000. This money was acquired through industry, economy, conscientious efforts to give full value, indomitable perseverance and the death of an uncle who left the editor \$45,999.50.

AMEN AND AMEN!

Most newspapers have paid their respects of late to that nefarious animal, the female slacker. The Decatur Democrat handles the matter thus:

"One can't help wondering what will be done with the 'woman slacker'—the girls and women who pace the street aimlessly, day after day, without producing anything for the good of the world. The men loafers have been called slackers and the law has even taken them in hand, if no fight—work! Someone suggests that the girls who gad about might be put into a sort of tread-mill arrangement whereby Red Cross supplies could be produced while they tread. The mother of one girl-gad-about appeared recently in a store and sat down nearly 'tuckered' out from scrubbing and working about the house. At the same time her daughter was heard planning an eighteen mile 'hike' with apparently no purpose in mind, other than pleasure."

The woman slacker is to be seen on all sides. Every town and city and many rural communities have 'em. At a time in the nation's history when all able bodied persons who are not at work should be ashamed to show their faces, a walk down any street will show up the female slacker who has naught to do, it seems, but sit on a shaded porch, dangle her pedal extremities and show her silk stockings, (and, incidentally, her legs) to those who might happen to pass her way.

Ever notice 'em? So have we.

"The American's Creed."

"I believe in the United States of America as a government of the people, by the people, for

the people; whose just powers are derived from the consent of the governed; a democracy in a republic; a sovereign nation of many sovereign states; a perfect union, one and inseparable; established upon those principles of freedom, equality, justice and humanity for which the American patriots sacrificed their lives and fortunes.

"I therefore, believe it is my duty to my country to love it; to support its constitution; to obey its laws; to respect its flag, and to defend it against all enemies."

"LAND-ING" A JOB

Start Right, Young Man

You ask yourself why you failed in certain instances to "land" a better job. Something went wrong; your handwriting was not satisfactory, or your ability to write business letters was questioned, or perhaps you lacked the little extra power to close the transaction—caused, perhaps, by lack of confidence in your ability to "deliver the goods."

The Draughon Training, AT COLLEGE or BY MAIL, will give you both confidence and ability.

W. F. JONES, JR., Assistant Cashier Exchange Bank, Trenton, Tenn., writes: "I OWE my SUCCESS to the training I received at DRAUGHON'S. I think Draughon's Colleges are the only ones that are able to fit students for important positions with banks."

If you want to go up in the business world, start right, begin now, by sending for Catalogue of Draughon's Practical Business College, Nashville, Tenn. POSITIONS SECURED.

OUR SAVED FOOD  
FED THE ALLIES

Food Administrator Writes President America Conserved 141,000,000 Bushels Wheat.

CREDIT DUE TO WOMEN.

Meat and Fat Shipments Increased by 844,600,000 Pounds.

Conservation measures applied by the American people enabled the United States to ship to the Allied peoples and to our own forces overseas 141,000,000 bushels of wheat and 844,600,000 pounds of meat during the past year, valued in all at \$1,400,000,000. This was accomplished in the face of a serious food shortage in this country, bespeaking the wholeheartedness and patriotism with which the American people have met the food crisis abroad.

Food Administrator Hoover, in a letter to President Wilson, explains how the situation was met. The voluntary conservation program fostered by the Food Administration enabled the piling up of the millions of bushels of wheat during 1917-18 and the shipment of meat during 1917-18.

The total value of all food shipments to Allied destinations amounted to \$1,400,000,000, all this food being bought through or in collaboration with the Food Administration. These figures are all based on official reports and represent food exports for the harvest year that closed June 30, 1918.

The shipments of meats and fats (including meat products, dairy products, vegetable oils, etc.) to Allied destinations were as follows:

Fiscal year 1916-17, 2,100,000,000 lbs.  
Fiscal year 1917-18, 2,301,100,000 lbs.

Increase ..... 841,000,000 lbs.

Our slaughterable animals at the beginning of the last fiscal year were not appreciably larger than the year before and particularly in hogs; they were probably less. The increase in shipments is due to conservation and the extra weight of animals added by our farmers.

The full effect of these efforts began to bear their best results in the last half of the fiscal year, when the exports to the Allies were 2,133,100,000 pounds, as against 1,200,000,000 pounds in the same period of the year before. This compares with an average of 801,000,000 pounds of total exports for the same half years in the three-year pre-war period.

In cereals and cereal products reduced to terms of cereal bushels our shipments to Allied destinations have been:

Fiscal year 1916-17, 200,000,000 bushels  
Fiscal year 1917-18, 340,000,000 bushels

Increase ..... 80,000,000 bushels

Of these cereals our shipments of the prime breadstuffs in the fiscal year 1917-18 to Allied destinations were: Wheat 181,000,000 bushels and of rye 18,000,000 bushels, a total of 199,000,000 bushels.

The exports to Allied destinations during the fiscal year 1916-17 were: Wheat 135,100,000 bushels and rye 2,300,000 bushels, a total of 137,400,000 bushels. In addition some 10,000,000 bushels of 1917 wheat are now in port for Allied destinations or en route thereto. The total shipments to Allied countries from our last harvest of wheat will be therefore, about 141,000,000 bushels, or a total of 154,000,000 bushels of prime breadstuffs. In addition to this we have shipped some 10,000,000 bushels to neutrals dependent upon us, and we have received some imports from other quarters.

"This accomplishment of our people in this matter stands out even more clearly if we bear in mind that we had available in the fiscal year 1916-17 from net carry-over and as surplus over our normal consumption about 200,000,000 bushels of wheat which we were able to export that year without trenching on our home loaf," Mr. Hoover said. "This last year, however, owing to the large failure of the 1917 wheat crop, we had available from net carry-over and production and imports only just about our normal consumption. Therefore our wheat shipments to Allied destinations represent approximately savings from our own wheat bread."

"These figures, however, do not fully convey the volume of the effort and sacrifice made during the past year by the whole American people. Despite the magnificent effort of our agricultural population in planting a much increased acreage in 1917, not only was there a very large failure in wheat, but also the corn failed to mature properly, and our corn is our dominant crop. "I am sure," Mr. Hoover wrote in concluding his report, "that all the millions of our people, agricultural as well as urban, who have contributed to these results should feel a very definite satisfaction that in a year of universal food shortages in the northern hemisphere all of those people joined together against Germany have come through into sight of the coming harvest not only with wealth and strength fully maintained, but with only temporary periods of hardship."

"It is difficult to distinguish between various sections of our people—the homes, public eating places, food trades, urban or agricultural populations—in assessing credit for these results, but no one will deny the dominant part of the American women."
